

Absorbent Protected with mPale™ Antimicrobial

Our Clean Up Biohazard Spill Kit has been vetted, approved, and under contract for distribution throughout the largest Group Purchasing Organization in the U.S.

Description:

Primary Use: An Emergency Response Tool for effective removal of *significant biohazard* incidents (i.e. bodily fluids). Clean Up will uniquely encapsulate odors, an unwanted nuisance in the restaurant environment. *The Clean Up kit is designed to be used as an easily accessible new protocol for all employees.*

Differentiators:

- Single dose package design offers quick and effective response to large incidents
- Absorbs liquids, solids, and oils
- Once applied the contaminate becomes easily swept
- Applied and removed with little to no airborne dusting
- Odor is encapsulated without the use of noxious perfumes
- Kit includes basics tools for large biohazard removal so employees can readily respond to volatile situations thus establishing a protocol that can be utilized within the entire restaurant environment.

Value Proposition:

- Response time to diarrhea and vomitus incidents is significantly reduced; saving labor and reducing liability for cross contamination
- Slip and fall incidences are reduced to enhance risk management programs
- Easy access and simple instructions for use of Clean Up encourages cross-training among employees
- Immediate response avoids annoyance and relieves embarrassing situations
- Employees have a tool at their disposal to protect themselves and their customers
- OSHA Compliant Spill Kits©
